Summer 2020 **Transit** Updates:

1. There is no charge to ride the Morris Transit this summer. This is in part to prevent the spread of COVID-19 through transfer of money. As of right now our plan is to resume collecting fares on September 1st, 2020.
2. The hourly stops at Nature's Edge, Willie's, and UMM are canceled until further notice. If you need a ride from any of these places, give us a call!
3. Remember to call in advance in order to ensure you get a ride at the time you want. Riders calling an hour or two in advance is helpful to the drivers and allows us to more efficiently and safely schedule rides.

If you ever have any questions regarding the Morris Transit please don't hesitate to comment on a post, message our Facebook page, or give us a call at (320) 589-1000.

KEEPING YOU MOVING.

Orthopedic appointments &
consultations **320-589-7604**

Your total orthopedic care starts and ends at Stevens Community Medical Center. From broken bones to total joint replacements, Dr. Holte, Dr. Jay, and Dr. Brandt are here to *keep you moving*.

SCMC has two board-certified surgeons and an orthopedic nurse practitioner, committed to providing a full-service orthopedic presence for you. SCMC would like to welcome back Dr. Michael Holte and is also excited to introduce Morris native, Dr. Tim Jay. Along with the two orthopedic surgeons, SCMC also welcomes Amy Brandt, orthopedic nurse practitioner. SCMC is fortunate to have a strong orthopedic team and also has a caring and experienced nursing staff, two certified nurse anesthetists, and on-site physical therapy to make your orthopedic care experience convenient, compassionate, and tailored to your needs.

Whether you sprain it, tear it, pull it, break it, or wear it out – SCMC is committed to *keeping you moving*.

MEET YOUR **NEW, BETTER** 3D™ MAMMOGRAM

Why choose the Genius™ Exam?

This type of exam provides better, earlier breast cancer detection compared to 2D and it finds 20-65% more invasive breast cancers than 2D mammography alone. Doctors are able to screen for breast cancer with greater accuracy— which means better breast cancer detection and a reduced chance of being called back for additional imaging.
