Opening Act David Stoddard

Noted lyricist and composer David Stoddard is a songwriter and teacher living in Western Minnesota. He tours throughout the US and Canada, where he plays mostly concert venues, living rooms, and other dedicated listening environments. David has won the Kerrville New Folk award, as well as songwriting awards at the South Florida Folk Festival, the Tucson Folk Festival, the Minnesota Folk Festival, and others.

Prairie Wind Players is supported by a grant from the Lake Region Arts Council through a Minnesota State Legislative Appropriation. Additional financial support comes from our members, corporate sponsors, and the Clarence and Rose Ray Memorial Fund.

IN THE LIBERAL ARTS

Mystical Experience@Death:

A Politics of Knowledge

an introduction to the debates on the meaning
of 'mystical' experiences near death—
near-death experiences, deathbed visions,
or visions of the bereaved

Allan Kellehear, PhD, FAcSS

50th Anniversary Professor (End of Life Care)
at the University of Bradford in England

**Monday, September 17, 2018
7 p.m. | Humanities Fine Arts Recital Hall
reception follows**

Mystical experiences reported by dying people and the bereaved have been known from time immemorial and across all cultures. However, in the last half century contemporary neuroscience writers have identified these as evidence of organic abnormalities near death. On the other hand, New Age movements have embraced these experiences as 'evidence' of personal survival over death. What do we really know about these experiences, and how good is the academic research in this field? A look behind the debates and the critical dialogue reveals a politics of knowledge alive and well. This is not dissimilar to other topic areas in death and dying.

Allan Kellehear is 50th Anniversary Professor (End of Life Care) at the University of Bradford in England. His research work investigates human dying conduct and experiences. He is also the founder of the main practice model for community and civic engagement within the hospice movement.

PRAIRIE PIONEER DAYS **IS MOVING in 2019**

Starting on Friday, September 14th at the Morris Theatre:

The Meg

Friday & Saturday 7:00PM

Sunday 2:00PM & 7:00PM

FLIP Tuesday 9:00PM

Monday, Wednesday, Thursday 7:00PM

Five years ago, expert sea diver and Naval Captain Jonas Taylor encountered an unknown danger in the unexplored recesses of the Mariana Trench that forced him to abort his mission and abandon half his crew.

Though the tragic incident earned him a dishonorable discharge, what ultimately cost him his career, his marriage and any semblance of honor was his unsupported and incredulous claims of what caused it - an attack on his vessel by a mammoth, 70-foot sea creature, believed to be extinct for more than a million years. But when a submersible lies sunk and disabled at the bottom of the ocean - carrying his ex-wife among the team onboard - he is the one who gets the call. Whether a shot at redemption or a suicide mission, Jonas must confront his fears and risk his own life and the lives of everyone trapped below on a single question: Could the Carcharodon Megalodon - the largest marine predator that ever existed - still be alive ... and on the hunt? Rated PG-13, 113 minutes. From Warner Brothers.

Alpha

Friday & Saturday 9:10PM

Sunday 4:30PM & 9:10PM

FLIP Tuesday 7:00PM

Monday, Wednesday, Thursday 9:10PM

An epic adventure set in the last Ice Age, ALPHA tells a fascinating, visually stunning story that shines a light on the origins of man's best friend. While on his first hunt with his tribe's most elite group, a young man is injured and must learn to survive alone in the wilderness. Reluctantly taming a lone wolf abandoned by its pack, the pair learn to rely on each other and become unlikely allies, enduring countless dangers and overwhelming odds in order to find their way home before winter arrives. Rated PG-13, 96 Minutes. From Studio 8.

Searching

Friday & Saturday 7:10PM & 9:00PM

Sunday 2:15PM & 7:10PM & 9:00PM

Monday - Thursday 7:10PM & 9:00 PM

After David Kim (John Cho)'s 16-year-old daughter goes missing, a local investigation is opened and a detective is assigned to the case. But 37 hours later and without a single lead, David decides to search the one place no one has looked yet, where all secrets are kept today: his daughter's laptop. In a hyper-modern thriller told via the technology devices we use every day to communicate, David must trace his daughter's digital footprints before she disappears forever. Rated PG-13, 102 minutes. From Screen Gems.
