# TELESTROKE >>

Improving community health with enhanced care for stroke patients

- 1 AVAILABLE 24/7
- 2 CONNECT WITH A NEUROLOGIST IN REAL TIME
- 3 QUICK TREATMENT= LESS BRAIN DAMAGE

## WHAT IS TELESTROKE

Telestroke uses video conferencing technology to allow a stroke neurologist from St. Cloud Hospital Stroke Center to evaluate a patient in another hospital, view diagnostic scans and recommend treatment.

Through Telestroke, interventions such as intravenous tissue plasminogen activator (IV tPA) medication can quickly be administered to break up clots. It is considered the first line of treatment for acute ischemic stroke but it must be administered within a 4 ½ hour window from the onset of symptoms to work best. IV tPA is the only U.S. Food and Drug Administration-approved drug for the treatment of acute ischemic strokes.

Telestroke services, available 24/7, saves valuable time and brain which allows patients to recover quicker and suffer less disability.

Stevens Community Medical Center now provides Telestroke services to patients thanks to a partnership with St. Cloud Hospital Stroke Center.

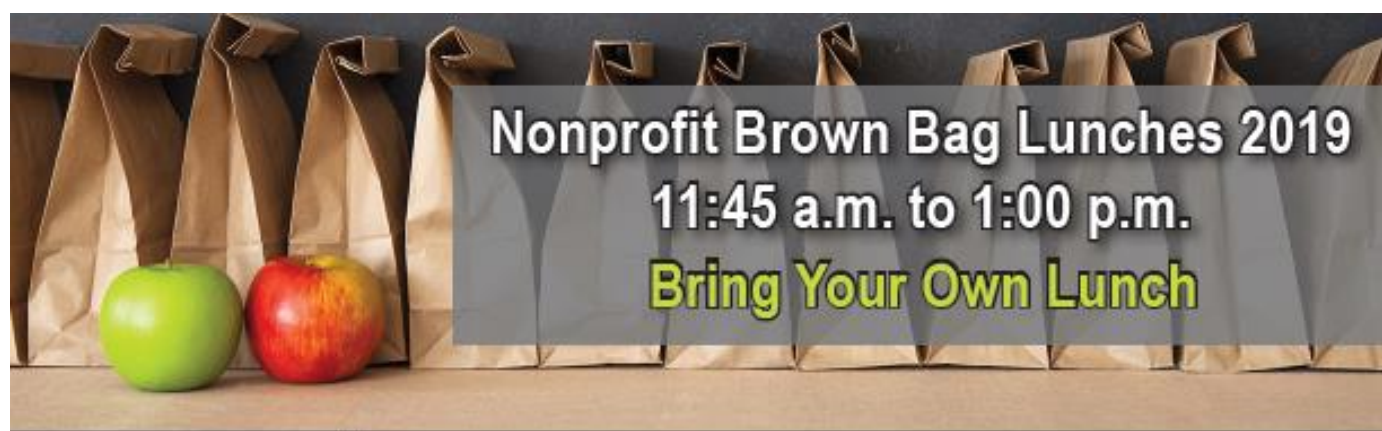

## SCMC WILL BE ABLE TO:

- > CONNECT WITH A NEUROLOGIST IN REAL TIME
